

For Immediate Release: NR 09-08

EXETER APPOINTS ROGER WALSH AS A DIRECTOR

Vancouver, BC, March 19, 2009 – Exeter Resource Corporation (NYSE-AMEX: XRA, TSX-V: XRC, Frankfurt: EXB – “Exeter” or the “Company”) is pleased to announce the appointment of Mr. Roger Walsh as a Director.

Mr. Walsh was most recently Vice President of Corporate Development for Jinshan Gold Mines Inc. for two years and prior to that spent two years as Vice President Corporate Development for Ivanhoe Mines Ltd. Prior to joining Ivanhoe Mines, Mr. Walsh was a founding partner of Geographe Corporate Advisory Limited, a corporate advisory firm providing acquisition, divestment and strategic advisory services to the international mining sector. Mr. Walsh holds a Bachelor of Business degree and originally qualified as a Chartered Accountant in Australia with PricewaterhouseCoopers.

Concurrent with this appointment, the Company has awarded to Mr. Walsh, subject to shareholder and TSX Venture Exchange approval, 300,000 incentive stock options exercisable for a period of five years at an exercise price of \$3.35.

About Exeter

Exeter Resource Corporation is a Canadian mineral exploration company focused on the discovery and development of gold and silver properties in South America. Following the closing of its recent equity financing, the Company has \$41 million in its treasury.

The Caspiche gold-copper discovery is situated in the Maricunga gold district of Chile, between the Refugio mine (Kinross Gold Corp.) and the giant Cerro Casale gold deposit (Barrick Gold Corp. and Kinross Gold Corp.). The Company expects to release a preliminary National Instrument 43-101 (“NI 43-101”) compliant resources estimate in the second quarter of 2009. Drilling currently underway will be included in an updated NI 43-101 compliant resources estimate expected in September 2009. The initial resource target is large, reflecting results to date and the scale of similar gold and/or gold-copper porphyry systems in the immediate area.

Exeter’s priority on its **Cerro Moro high grade gold-silver property** in Argentina is the Escondida vein where drilling has returned multiple intercepts of 12-18 grams per tonne gold equivalent* over potentially mineable widths. The results from drilling to December 2008 will be used to produce a NI 43-101 compliant resources estimate, expected during the second quarter of 2009. Exeter will continue to develop its conceptual models so that on receipt of a NI 43-101 resources estimate, it can advance the project to the scoping study level.

No site work is planned on **the Don Sixto gold-silver project** in Argentina over the next quarter. The Company will continue to work with provincial authorities and with representatives of other mining companies, to effect amendment to the 2007 legislation that banned the use of cyanide in mining operations in Mendoza Province.

* Note: Gold equivalent grade is calculated by dividing the silver assay result by 60, adding it to the gold value and assuming 100% metallurgical recovery.

Safe Harbour Statement – This news release contains “forward-looking information” and “forward-looking statements” (together, the “forward-looking statements”) within the meaning of applicable securities laws and the United States Private Securities Litigation Reform Act of 1995. These forward-looking statements are made as of the date of this news release. Users of forward-looking statements are cautioned that actual results may vary from the forward-looking statements contained herein. Forward-looking statements include, but are not limited to, the Company’s belief as to the extent and timing of its drilling programs and exploration results, the potential tonnage and grades of deposits, timing and establishment of resources estimates, potential for financing its activities, potential production from its properties and expected cash reserves. While the Company has based these forward-looking statements on its expectations about future events as at the date that such statements were prepared, the statements are not a guarantee of the Company’s future performance and are subject to risks, uncertainties, assumptions and other factors which could cause actual results to differ materially from future results expressed or implied by such forward-looking statements. Such factors and assumptions include, amongst others, the effects of general economic conditions, changing foreign exchange rates and actions by government authorities, uncertainties associated with legal proceedings and negotiations and misjudgements in the course of preparing forward-looking information. In addition, there are also known and unknown risk factors which could cause the Company’s actual results, performance or achievements to differ materially from any future results, performance or achievements expressed or implied by the forward-looking statements. Known risk factors include, among others, risks associated with project development; the need for additional financing; operational risks associated with mining and mineral processing; fluctuations in metal prices; title matters; uncertainties and risks related to carrying on business in foreign countries; environmental liability claims and insurance; reliance on key personnel; currency fluctuations; and competition, as well as those factors discussed in the Company’s Annual Information Form for the financial year ended December 31, 2007, dated March 28, 2008 filed with the Canadian Securities Administrators and available at www.sedar.com. Subject to applicable securities laws, the Company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. There can be no assurance that forward-looking statements, or the material factors or assumptions used to develop such forward-looking statements, will prove to be accurate. Accordingly, readers should not place undue reliance on forward-looking statements.
