Management's Discussion and Analysis

August 9, 2011

In this document: (i) unless the content otherwise requires, references to "our", "us", "its", "the Company" or "Exeter" mean Exeter Resource Corporation and its subsidiaries; (ii) information is provided as of June 30, 2011, unless otherwise stated; (iii) all references to monetary amounts are to thousands of Canadian dollars, unless otherwise stated; and (iv) "\$" refers to Canadian Dollars and "US\$" refers to US dollars.

Forward Looking Statements

This MD&A contains "forward-looking information" and "forward-looking statements" (together, the "forward-looking statements") within the meaning of applicable securities laws and the United States Private Securities Litigation Reform Act of 1995, as amended. All statements other than statements of historical fact are forward looking statements.

These forward-looking statements, principally under the heading "Outlook", but also elsewhere in this document include estimates, forecasts and statements as to the Company's belief with respect to, among other things, the timing of its drilling, exploration programs and exploration results and completion of various studies, adequacy of water rights for the oxide project, exercise of the option to acquire 100% of the Sideral project adjacent to its Caspiche project, the Company's ability to mitigate against foreign exchange risk, changes required to the Company's accounting policies on adoption of IFRS, the ability of the Company to access capital to fund its activities, the ability of the Company to respond to market fluctuations and government regulations and the ability of the Company to demonstrate that a commercially viable mineral deposit exists on the Company's Caspiche project.

These forward-looking statements appear in a number of different places in this document and can be identified by words and phrases such as, but not limited to, "estimates", "plans", "is expected", or variations of such words or phrases, or statements that certain activities, events or results "may", "would" or "could" occur. While the Company has based these forward-looking statements on its expectations about future events as at the date that this document was prepared, the statements are not a guarantee of the Company's future performance and are subject to risks, uncertainties, assumptions and other factors which could cause actual results to differ materially from future results expressed or implied by such forward-looking statements. The Company's forward-looking statements are based on the beliefs, expectations and opinions of management on the date the statements are made, and the Company does not assume any obligation to update forward-looking statements if circumstances or management's beliefs, expectations or opinions should change except as required by law. Such factors and assumptions include, amongst others, the effects of general economic conditions, changing foreign exchange rates and actions by government authorities, uncertainties associated with negotiations, misjudgements in the course of preparing forward-looking statements, fluctuations in gold, copper, silver and other commodity prices and currency exchange rates; uncertainties relating to interpretation of drill results and the geology, continuity and grade of mineral deposits; uncertainty of estimates of capital and operating costs, recovery rates, production estimates and estimated economic return; the need for cooperation of government agencies and native groups in the exploration and development of properties and the issuance of required permits; the need to obtain additional financing to develop properties and uncertainty as to the availability and terms of future financing; the possibility of delay in exploration or development programs or in construction projects and uncertainty of meeting anticipated program milestones; uncertainty as to timely availability of permits and other governmental approvals and other risks and uncertainties disclosed under "Risks" below and other risks and uncertainties disclosed in Exeter's Annual Information Form for the year ended December 31, 2010, filed with the Canadian securities regulatory authorities and other information released by Exeter and filed with the appropriate regulatory agencies. Although the Company has attempted to identify important risk factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other risk factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. For the reasons set forth above, readers should not place undue reliance on forward-looking statements. All statements are made as of the date of this MD&A and the Company is under no obligation to update or alter any forward-looking statements except as required under applicable securities laws.

Cautionary note to U.S. Investors concerning reserve and resource estimates

This MD&A and other information released by Exeter have been prepared in accordance with the requirements of the securities laws in effect in Canada, which differ from the requirements of United States securities laws. The terms “mineral reserve”, “proven mineral reserve” and “probable mineral reserve” are Canadian mining terms as defined in accordance with Canadian National Instrument 43-101 – Standards of Disclosure for Mineral Projects (“NI 43-101”) and the Canadian Institute of Mining, Metallurgy and Petroleum (the “CIM”) - *CIM Definition Standards on Mineral Resources and Mineral Reserves*, adopted by the CIM Council, as amended (“CIM Standards”). These definitions differ from the definitions in SEC Industry Guide 7 under the United States Securities Act of 1993, as amended (the “Securities Act”). Under SEC Industry Guide 7 standards, a “final” or “bankable” feasibility study is required to report reserves, the three-year historical average price is used in any reserve or cash flow analysis to designate reserves and the primary environmental analysis or report must be filed with the appropriate governmental authority.

In addition, the terms “mineral resource”, “measured mineral resource”, “indicated mineral resource” and “inferred mineral resource” are defined in and required to be disclosed by NI 43-101 and the CIM Standards; however, these terms are not defined terms under SEC Industry Guide 7 and are normally not permitted to be used in reports and registration statements filed with the SEC. Investors are cautioned not to assume that any part or all of mineral deposits in these categories will ever be converted into reserves. “Inferred mineral resources” have a great amount of uncertainty as to their existence, and great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of an inferred mineral resource will ever be upgraded to a higher category. Under Canadian rules, estimates of inferred mineral resources may not form the basis of feasibility or pre-feasibility studies, except in rare cases. Investors are cautioned not to assume that all or any part of an inferred mineral resource exists or is economically or legally mineable. Disclosure of “contained ounces” in a resource is permitted disclosure under Canadian regulations; however, the SEC normally only permits issuers to report mineralization that does not constitute “reserves” by SEC Industry Guide 7 standards as in place tonnage and grade without reference to unit measures.

Accordingly, information contained in this MD&A contains descriptions of our mineral deposits that may not be comparable to similar information made public by U.S. companies subject to the reporting and disclosure requirements under the United States federal securities laws and the rules and regulations thereunder.

Report on Operations

Second Quarter 2011

The Company continued with drilling and prefeasibility work at the Caspiche project in the Maricunga region of Chile. In February 2011, the Company exercised the option to acquire the Caspiche project from Anglo American. Additionally, the Company entered into an option agreement with Xstrata Copper to acquire the Sideral project adjacent to the Caspiche project and optioned water rights for the Caspiche project.

The 2010/2011 drill season ended in May due to the onset of the Andean winter. Drilling during this period focused on the acquisition of material from Caspiche for ongoing metallurgical test work and regional drilling at the Company's Caspiche Epithermals and Sideral prospects. A detailed review of the Companies optioned water rights located near Laguna Verde began during the quarter and is ongoing.

In June the Company announced the results of its stand alone Oxide only pre-feasibility study on the Caspiche deposit. Work continued on the much larger pre-feasibility study (PFS) associated with the entire Caspiche ore body. Associated with this PFS study are several metallurgical test programs which began in the quarter and are currently in progress and are designed to support the assumptions on metallurgical recoveries and treatment options as well as a detailed scoping study on In Pit Crushing and Conveying (IPCC) which was approved for development to the PFS level of detail at the end of the quarter.

CHILE

Caspiche Project

Northern Chile - Maricunga

In 2005, the Company entered into an agreement with Minera Anglo American Chile Limitada and Empresa Minera Mantos Blancos S.A. ("Anglo American") with respect to seven properties in the Maricunga region of Chile. The terms of the agreement provided for increasing annual drilling and exploration commitments over five years, and the phased reversion of five properties to Anglo American which has occurred. Exeter has satisfied its obligations under the agreement and spent more than the required minimum expenditures of US\$2.55 million, including completing more than 15,500 metres ("m") of required drilling, and during the first quarter of 2011, exercised its option to acquire a 100% interest in the properties. Anglo American will retain a 3% net smelter royalty ("NSR") from production from the property and has the right to buy the property back if it is not put into production within 15 years from the date that the Company exercised its option. In addition, the Company will be required to pay a further 0.08% NSR from production pursuant to an agreement with a private entity.

The Company paid an advance annual royalty of US\$250,000 for the period ended March 31, 2012. The Company is required to make this payment annually up until March 31, 2020 and thereafter US\$1 million annually for the period March 31, 2021 to March 31, 2025 or until commencement of commercial production at which time the advance royalty will cease and NSR will be payable.

All hard copy data received from Anglo American was digitized, and the satellite (Aster) imagery for the area secured, prior to the commencement of field work in November 2005. Magnetic data acquired for Caspiche was reprocessed to delineate targets for epithermal gold mineralization. Exploration, including geochemical sampling and prospecting was conducted through the field season in early 2006. This work resulted in early reversion of five of the seven properties to Anglo American and allowed Exeter to focus on the two most favourable properties, jointly referred to as the Caspiche project. Previously, exploration by Newcrest Mining led to the discovery and subsequent drilling of the upper levels of a copper-gold porphyry system at Caspiche.

The Caspiche project is located in a prolific region of gold porphyry deposits, 15 kilometres ("km") (10 miles) southeast of Kinross Gold's Maricunga open pit mine (formerly known as the Refugio mine) and 11 km (7 miles) north of Barrick Gold – Kinross Gold's Cerro Casale project. Porphyry gold-copper mineralization in the Maricunga belt generally forms as clusters of deposits in close proximity; therefore there is potential for encountering additional mineralized centers at Caspiche.

Ongoing exploration work to better determine the grade continuity of the Caspiche porphyry deposit and additional assessments of the potential for deleterious elements and metallurgical characterization studies are in progress, along with baseline environmental and hydrological and pre-feasibility studies.

Sideral project

The Company entered into an option agreement to acquire 100% of the Sideral project adjacent to its Caspiche project. The agreement provides for the Company to acquire 100% of the Sideral property by meeting escalating annual drilling requirements, to a total of 15,000 m (49,213 ft), within four years. After the 15,000 m of drilling is completed, the vendor has a once only back in right to acquire a 60% interest in the property, provided the discovery of a deposit of greater than 100 million tons at +0.5% copper has been made. Should the vendor elect to back in, it will be required to repay the Company three times its expenditure on the property, alternatively its interest will revert to a 2% NSR. The Company has the right to purchase 50% of the NSR for \$10 million.

Water rights option

The Company secured an option on water rights to a total volume of 300 litres per second from a private Chilean company, sufficient to feed the oxide project. The rights relate to surface water flows and are consumptive in nature. The option agreement provides for staged payments deductible from a purchase price of US\$15.0 million. The Company can withdraw from the option at any time without penalty.

Results from Operations

The Company began 2011 with 86,307,503 common shares outstanding and ended the period with 87,137,753 common shares outstanding. During the period ended June 30, 2011, the Company received proceeds of \$1,742 and issued 830,250 common shares upon the exercise of options. Shares issued and proceeds received are summarized below:

	Options Exercised	Total
Shares issued	830,250	830,250
Proceeds (000's)	\$ 1,742	\$ 1,742

As at August 9, 2011 the Company had 87,137,753 shares outstanding.

Summary of Financial Results

Selected Information

The Company's interim consolidated financial statements for the second quarter ended June 30, 2011 (the "Interim Financial Statements") have been prepared in accordance with International Financial Reporting Standards ("IFRS"). The following selected financial information is taken from the Interim Financial Statements and should be read in conjunction with those statements.

Second Quarter Ended June 30, 2011

The Company ended the second quarter with \$80.6 million of cash and cash equivalents. The Company incurred approximately \$4.9 million in exploration costs in the second quarter of 2011. Stock based compensation expense of \$3.3 million was due to recognizing the expense associated with the vesting of certain stock options granted during the quarter and from options that were previously granted to employees and consultants.

Second Quarter 2011 Compared to Second Quarter 2010

At June 30, 2011 the Company had \$80.6 million in cash and cash equivalents, \$40.8 million more than the \$39.8 million held at June 30, 2010. This additional cash resulted from the October 2010 equity financing in which the Company raised gross proceeds of \$50.0 million, and the November 2010 exercise of the over-allotment option for gross proceeds of \$7.5 million. Mineral property exploration expenses of \$11.4 million in the second quarter of 2011, was \$0.8 million lower than the \$12.2 million incurred in continuing operations in the second quarter of 2010 because of lower drilling activity at Caspiche.

The following is a summary of quarterly results for continuing operations taken from the Company's unaudited quarterly consolidated financial statements reflects information related to continuing operations:

	(\$000's, except share data)	
Three month period ended June 30,	2011	2010
Interest income	\$ 244	\$ 87
Mineral property exploration costs	\$ 4,912	\$ 5,135
Stock-based compensation ¹	\$ 3,325	\$ 2,179
Loss	\$ 8,123	\$ 7,593
Basic and diluted loss per common share	\$ 0.09	\$ 0.10

1) stock-based compensation costs have been allocated to administrative salaries and consulting, management compensation, directors' fees, mineral property exploration expenditures and shareholder communications.

	(\$000's)	
Financial Position	June 30,	December 31,
As at	2011	2010
Total assets	\$ 81,480	\$ 91,371
Total liabilities	\$ 1,108	\$ 1,696
Share capital	\$ 241,595	\$ 238,454
Deficit	\$ (192,646)	\$ (175,246)

The Company's combined cash and cash equivalents as at June 30, 2011 totaled \$80.6 million compared with \$90.6 million as at December 31, 2010. The funds are highly liquid and are available immediately. The Company has \$1.1 million (December 31, 2010 - \$1.7 million) of current liabilities, with the decrease reflecting the Company's lower level of site activity relating to drilling work.

The following selected financial information is a summary of quarterly results taken from the Company's unaudited quarterly Interim Financial Statements:

Comparison to Prior Quarterly Periods

(\$000's, except share data)	2011		2010				2009	
	2nd Quarter*	1st Quarter*	4th Quarter*	3rd Quarter*	2nd Quarter*	1st Quarter*	4th Quarter**	3rd Quarter**
Total Revenues	-	-	-	-	-	-	-	-
Net loss (gain)	8,123	9,277	8,363	4,024	7,593	(106,216)***	10,358	5,391
Basic loss(gain) per common share	\$0.09	\$0.11	\$0.10	\$0.05	\$0.10	(\$1.44)	\$0.16	\$0.09
Diluted loss(gain) per common share	\$0.09	\$0.11	\$0.10	\$0.05	\$0.10	(\$1.32)	\$0.16	\$0.09

* IFRS

** Canadian GAAP

*** Includes a gain on the transfer of Argentine Assets of \$122.1 million

Net loss in the second quarter of 2011 was lower than in the previous quarter due to there being an advance royalty payment on the Caspiche project and the option of water rights which were incurred in the first quarter of 2011 and not repeated in the second quarter. Exploration costs were also lower compared to the previous quarter as the Andean winter led to the drill season being suspended in May.

A significant component in the loss for the periods noted above is stock-based compensation which has fluctuated quarter by quarter for a number of reasons including the vesting of certain options, approval dates of grants, and stock price volatility which is a component of the Black-Scholes pricing model that can significantly affect the fair value of options granted.

Supplemental Information:

Comparison to Prior Quarterly Periods – Continuing Operations

(\$000's, except share data)	2011		2010				2009

Liquidity and Capital Resources

The Company's cash and cash equivalents at June 30, 2011 totalled \$80.6 million compared to \$90.6 million at December 31, 2010, a decrease of about \$10.0 million. The Company continues to utilize its cash resources to fund project exploration and administrative requirements. Aside from cash and cash equivalents, the Company has no material liquid assets. While the Company has successfully raised funds through past capital financings, there are no guarantees that such source of funds will be available in the future.

Management continues to evaluate and adjust its planned level of activities to ensure that adequate levels of working capital are maintained. The availability of funding will affect the planned activity levels at the Caspiche project and expenditures will be adjusted to match available funding.

During the fourth quarter 2010, the Company completed an equity financing and issued 8,065,000 common shares at a price of \$6.20 per share for gross proceeds of \$50.0 million and upon exercise of the over-allotment option related to the financing, the Company issued 1,209,750 common shares at a price of \$6.20 per share for gross proceeds of \$7.5 million. The total net proceeds of the financing totalled \$53.8 million.

The Company intends to continue using its cash and cash equivalents for exploration and development of the Company's properties in Chile, with specific focus on Caspiche, and for general working capital purposes.

The Company has no loans or bank debt and there are no restrictions on the use of its cash resources. The Company has not issued any dividends and management does not expect this will change in the near future.

Financial Instruments

The Company's activities potentially expose it to a variety of financial risks, including credit risk, foreign exchange currency risk, liquidity and interest rate risk.

Credit risk is the risk that one party to a financial instrument, will fail to discharge an obligation and cause the other party to incur a financial loss. Financial instruments that potentially subject the Company to credit risk consist of cash and cash equivalents and accounts receivable. The Company deposits the majority of its cash and cash equivalents with high credit quality financial institutions in Canada and holds balances in banks in Chile as required to meet current expenditures. The carrying amount of financial assets recorded in the financial statements, net of any allowances for losses, represents the Company's maximum exposure to credit risk.

The fair value of financial instruments at June 30, 2011 and December 31, 2010 is summarized as follows:

	<u>June 30, 2011</u>		<u>December 31, 2010</u>	
	<u>Carrying amount</u>	<u>Fair value</u>	<u>Carrying amount</u>	<u>Fair value</u>
Financial Assets				
<i>Loans and receivables</i>				
Cash and cash equivalents	\$ 80,592	\$ 80,592	\$ 90,608	\$ 90,608
Amounts receivable – at amortized cost	\$ 209	\$ 209	\$ 221	\$ 221
Due from related parties	\$ 116	\$ 116	\$ 9	\$ 9
Financial Liabilities at amortized cost				
Accounts payable and accrued liabilities	\$ 1,041	\$ 1,041	\$ 1,578	\$ 1,578
Due to related parties	\$ 67	\$ 67	\$ 118	\$ 118

The carrying amount of amounts receivable, accounts payable and accrued liabilities and due to related parties approximates fair value due to their short term to maturity.

The Company operates in a number of countries, including Canada and Chile, and it is therefore exposed to foreign exchange risk arising from transactions denominated in a foreign currency. However, the Company does not typically hold large cash balances in Chile and tries to reduce the effects of foreign exchange risk by sending cash to its foreign operations only when it is required to discharge current liabilities.

The Company's cash and cash equivalents, amounts receivable, accounts payable and accrued liabilities are held in several currencies (mainly Canadian Dollars, Chilean Pesos, US Dollars and Australian Dollars) and are therefore subject to fluctuation against the Canadian Dollar.

The Company had the following balances in foreign currency as at June 30, 2011 and December 31, 2010 as follows:

June 30, 2011			
(in thousands)			
	Chilean Pesos	US Dollars	Australian Dollars
Cash and cash equivalents	257,297	229	-
Amounts receivable	61,122	-	-
Accounts payable and accrued liabilities	(277,475)	(88)	(109)
Net balance	(40,944)	141	(109)
Equivalent in Canadian Dollars	(84)	136	(113)
Rate to convert to \$1.00 CDN	0.002061	0.9645	1.0348

December 31, 2010			
(in thousands)			
	Chilean Pesos	US Dollars	Australian Dollars
Cash and cash equivalents	353,252	298	-
Amounts receivable	52,047	-	-
Accounts payable and accrued liabilities	(435,008)	(173)	(111)
Net balance	(29,709)	125	(111)
Equivalent in Canadian Dollars	(63)	(124)	(113)
Rate to convert to \$1.00 CDN	0.002125	0.9946	1.0180

Based on the above net exposures as at June 30, 2011, and assuming that all other variables remain constant, a 10% depreciation or appreciation of the Chilean peso, US dollar and Australian dollar against the Canadian dollar would result in an increase/decrease of \$8, \$14 and \$11 respectively in the Company's net loss.

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate due to changes in market interest rates. The Company's interest rate risk mainly arises from the interest rate impact on the cash and cash equivalents. Cash and cash equivalents earn interest based on current market interest rates, which at period end ranged between 1.2% and 1.3%.

Based on the amount of cash and cash equivalents invested at June 30, 2011, and assuming that all other variables remain constant, a 0.5% change in the applicable interest rate would result in an increase/decrease of \$403 in the interest earned by the Company per annum.

Liquidity risk is the risk that an entity will encounter difficulty in raising funds to meet commitments associated with financial instruments. The Company manages liquidity by carefully monitoring all expenditures, by periodically raising equity funding and by closely controlling available cash and cash equivalent balances.

Contractual Obligations

The Company leases offices in Vancouver and Chile and has expenditure and option payment obligations related to its properties. Option payments and property expenditure obligations are contingent on exploration results and can be cancelled at any time should exploration results so warrant. In addition, the Company is required to pay an advance annual royalty to maintain its interest in Caspiche.

Commitments, mainly for rental of office and operating facilities, and access agreements are presented below.

Payments Due by Year

	Total	2011	2012 - 2013	2014 - 2016
Office and equipment leases*	\$ 444	\$ 65	\$ 176	\$ 203
Property access agreements	162	48	114	-
Total	\$ 606	\$ 113	\$ 290	\$ 203

* The Company together with two associated companies has entered into a lease for office premises. The amount reflected above is the Company's share of the lease obligation.

Related Party Transactions (\$000's)

Amounts due from related parties of \$116 at June 30, 2011 (December 31, 2010 - \$9) is for the recovery of common expenditures from two associated corporations with common directors. The amounts due from related parties are non-interest bearing and have no terms of repayment.

Amounts due to related parties of \$67 at June 30, 2011 (December 31, 2010 - \$118) is for management, consulting and exploration fees and for expenses incurred while conducting the Company's business, and ongoing exploration expenditures payable to a related company. The amounts due to related parties are non-interest bearing and have no terms of repayment.

During the six months ended June 30, 2011 a total of \$607 (2010 - \$990) was paid or accrued for related party transactions as described below:

- a) Exploration and consulting fees of \$180 (2010 - \$280) were paid or accrued to a corporation of which the President and CEO of the Company is a principal. As at June 30, 2011, the Company had amounts owing of \$20 (2010 - \$12) to this company.
- b) Exploration fees of \$101 (2010 - \$155) were paid or accrued to a corporation controlled by the Vice-President, Exploration and Development. As at June 30, 2011, the Company had amounts owing of \$26 (2010 - \$Nil) to this company.
- c) Management fees of \$88 (2010 - \$195) were paid to a corporation controlled by the Chairman of the Company. As at June 30, 2011, the Company had amounts owing of \$8 (2010 - \$Nil) to this company.
- d) Management fees of \$100 (2010 - \$215) were paid or accrued to a corporation controlled by the Chief Financial Officer of the Company. As at June, 2011, the Company had amounts owing of \$10 (2010 - \$Nil) to this company.
- e) Management fees of \$100 (2010 - \$145) were paid or accrued to a corporation controlled by the Vice-President, Corporate Development and Legal Counsel. As at June 30, 2011, the Company had amounts owing of \$Nil (2010 - \$Nil) to this company.
- f) The Company paid or accrued rent expense of \$31 (2010 - \$Nil) to a company controlled by a director of the Company. Of this amount, \$16 was recovered from a corporation with common directors. As at June 30, 2011, the Company had amounts owing of \$Nil (2010 - \$Nil) to this company.
- g) The Company and Extorre incur certain expenditures for staff and exploration expenditures on behalf of each other. The net amount provided or incurred by the Company on behalf of Extorre during the six months ended June 30, 2011 was \$240 (2010- \$7). As at June 30, 2011, the Company had amounts owing of \$Nil (2010 - \$182) to this company.
- h) Legal Fees of \$6 (2010 - \$31) were paid or accrued to a company of which one of the officers of the Company was a partner. As at June 30, 2011, the Company had amounts owing of \$3 (2010 - \$Nil) to this company.

Upon completion of the Arrangement, the Company reached an agreement whereby Extorre will reimburse the Company for common expenditures incurred, based upon a mutually agreed percentage allocation of such expenditures. For the period ended June 30, 2011, the percentage allocation was 40%, resulting in approximately net \$249 being recovered for administrative support, office overhead and travel from Extorre.

Outlook

The Company plans to focus all efforts on continuing to add value to its Caspiche project. Its recently completed drilling program was focused on adding confidence to the resource estimate through in-fill drilling and bringing the best mineralized inferred ounces to an indicated status. An updated resource model based on this infill drilling is scheduled to be completed during the third quarter of 2011. The Company has also initiated pre-feasibility studies on the project and will continue advancing its metallurgical test programs to optimize the recovery and exploitation of the known mineralization. Future exploration drilling is planned targeting potential new zones of mineralization at Caspiche epithermals and the Sideral project adjacent to Caspiche (part of an 100% option agreement with Xstrata).

International Financial Reporting Standards (“IFRS”)

The Canadian Accounting Standards Board required all public companies to adopt IFRS for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2011. The Company’s first filing under IFRS was the Q1 2011 filing which contains IFRS compliant financial statements on a comparative basis. Although IFRS uses a conceptual framework similar to Canadian GAAP, there are significant differences in accounting policy.

IFRS Transition

The Company developed a conversion implementation plan comprising three major phases. These include a scoping and planning phase, a design and build phase and an implement and review phase. The Company has completed the scoping and planning phase, and the design and build phase and implementation phase. The review phase will continue in future periods.

The following summarizes the Company’s progress and expectations with respect to its IFRS transition plan:

Initial scoping and analysis of key areas for which changes to accounting policies may be required.	Completed.
Detailed evaluation of potential changes required to accounting policies, information systems and business processes, including the application of IFRS 1 “First-time adoption of International Financial Reporting Standards”.	Completed.
Final determination of accounting policies and the quantitative impact of adopting IFRS on key line items in the Company’s financial statements.	Completed in conjunction with the Q1 2011 IFRS financial statements.
Resolution of the accounting policy change implications on information technology, internal controls and contractual arrangements.	Completed in conjunction with the Q1 2011 IFRS financial statements.

The Company’s staff and advisers involved in the preparation of financial statements have been appropriately trained on the relevant aspects of IFRS affecting the Company and the changes to accounting policies. The Board of Directors and Audit Committee have been regularly updated on the progress of the IFRS conversion plan, and are aware of the key aspects of IFRS affecting the Company.

Note 3 to the consolidated interim financial statements includes additional detail on the key Canadian GAAP to IFRS differences, accounting policy decisions and IFRS, First-Time Adoption of International Financial Reporting Standards, optional exemptions for significant or potentially significant areas that have had an impact on the Company's financial statements on transition to IFRS or may have an impact in future periods.

Impact of Adopting IFRS on the Company's Financial Statements

The adoption of IFRS will result in some changes to the Company's accounting policies that are applied in the recognition, measurement and disclosure of balances and transactions in its financial statements. However, based on its evaluation to date, the Company does not expect any changes to its accounting policies that would result in significant changes to line items within its financial statements.

The following provides a summary of the Company's evaluation of potential changes to accounting policies in key areas based on the current standards and guidance within IFRS. This is not intended to be a complete list of areas where the adoption of IFRS will require a change in accounting policies, but to highlight the areas that the Company has identified as having the most potential for a change in its significant accounting policies. The International Accounting Standards Board has a number of ongoing projects, the outcome of which may have an effect on the changes required to the Company's accounting policies on adoption of IFRS. At the present time however, the Company is not aware of any significant expected changes that would affect the reconciliations provided below.

	Three months ended June 30, 2010			Six months ended June 30, 2010		
	Canadian GAAP	Effect of transition to IFRS	IFRS	Canadian GAAP	Effect of transition to IFRS	IFRS
Income						
Interest income	\$ 87	\$ -	\$ 87	\$ 231	\$ -	\$ 231
Expenses						
Accounting and audit	18	-	18	81	-	81
Administration salaries and consulting	701	-	701	1,361	-	1,361
Amortization	14	-	14	26	-	26
Director's fees	682	-	682	1,944	-	1,944
Foreign exchange (gain) loss	42	-	42	(2)	-	(2)

	7,680	-	7,680	18,155	-	18,155
Loss from continuing operations	(7,593)	-	(7,593)	(17,924)	-	(17,924)
Gain (loss) from discontinued operations	-	-	-	(5,506)	122,053	116,547
Net income/(loss) and comprehensive income (loss) for the year/period	(7,593)	-	(7,593)	(23,430)	122,053	98,623
Transfer of net assets on Plan of Arrangement	-	-	-	(27,947)	(122,053)	(150,000)
Deficit at beginning of year/period	(111,482)	-	(111,482)	(111,482)	-	(111,482)
Deficit at end of year/period	\$ (162,859)	\$ -	\$ (162,859)	\$ (162,859)	\$ -	\$ (162,859)

i) IFRIC 17: Distributions of Non-Cash Assets to Owners

The guidance provided by IFRIC 17 requires that a Company which is distributing non-cash assets to its owners do so at the fair value of the assets which are being distributed. Under Canadian GAAP, the Company recorded the transfer of the non-cash assets in relation to the Plan of Arrangement at cost. By valuing the transfer of assets at fair value at the date of transition, the Company has now recognized a gain of approximately \$122,053 on the transfer to Extorre. The increase in fair value had no impact on the net cash flows of the Company as the gain was a non-cash item. The impact of recognizing the gain resulted in the Company recording a net gain of \$98,623 for the six month period ended June 30, 2010 compared to net loss of \$23,430 for the same period.

The following is a summary of the transition adjustments to Exeter's deficit and shareholder's equity from Canadian GAAP to IFRS:

	June 30, 2010
Deficit as reported under Canadian GAAP	\$ 162,859
Adjustment to the gain on assets transferred under the Plan of Arrangement	(122,053)
Adjustment to the value of net assets transferred under the Plan of Arrangement	122,053
Deficit as reported under IFRS	\$ 162,859
	June 30, 2010
Shareholder's Equity as reported under Canadian GAAP	\$ 39,542
Adjustment to the gain on assets transferred under the Plan of Arrangement	(150,000)
Adjustment to the value of net assets transferred under the Plan of Arrangement	150,000
Shareholder's Equity as reported under IFRS	\$ 39,542

Changes in Accounting Policy and Disclosures

In May 2011, the IASB issued the following standards which have not yet been adopted by the Company: IFRS 9, Financial instruments - Classification and Measurement (IFRS 9), IFRS 10, Consolidated Financial Statements (IFRS 10), IFRS 11, Joint Arrangements (IFRS 11), IFRS 12, Disclosure of Interests in Other Entities (IFRS 12), IAS 27, Separate Financial Statements (IAS 27), IFRS 13, Fair Value Measurement (IFRS 13) and amended IAS 28, Investments in Associates and Joint Ventures (IAS 28). Also in June 2011, the IASB amended IAS 19, Employee Benefits (IAS 19) and IAS 1, Presentation of Financial Statements (IAS 1), which has not yet been adopted by the Company. Each of the new standards is effective for annual periods beginning on or after January 1, 2013 with early adoption permitted. The Company has not yet begun the process of assessing the impact that the new and amended standards will have on its consolidated financial statements or whether to early adopt any of the new requirements.

The following is a brief summary of the new standards:

IAS 1 – Presentation of Financial Statements

This standard requires companies preparing financial statements under IFRS to group items within OCI that may be reclassified to the profit or loss. The amendments also reaffirm existing requirements that items in OCI and profit or loss should be presented as either a single statements or two consecutive statements. The amendments to IAS 1 set out in Presentation of Items of Other Comprehensive Income and are effective for fiscal years beginning on or after July 1, 2012.

IAS 19 - Post-Employment Benefits

In June 2011, the IASB issued an amended version of IAS 19, Employee Benefits (“IAS 19”). The amendments to IAS 19 are meant to improve the quality, transparency and comparability of information presented for post-employment benefits. For defined benefit plans, the amendments eliminate the option to defer actuarial gains and losses on the balance sheet through the “corridor method”. The amendments also require any remeasurement gains or losses, including actuarial gains and losses, to be recognized immediately and presented in other comprehensive income, eliminating the option to recognize and present these through the income statement. Additional disclosures will also be required to present better information about the characteristics, amounts recognized, and risks related to defined benefit plans. The amendments to IAS 19 are effective for financial years beginning on or after January 1, 2013 with earlier adoption permitted. The Company does not have post-employment benefits thus this policy will not have an impact on the Company’s financial statements.

IFRS 9 – Financial instruments - classification and measurement

This is the first part of a new standard on classification and measurement of financial assets that will replace IAS 39, Financial Instruments: Recognition and Measurement. IFRS 9 has two measurement categories: amortized cost and fair value. All equity instruments are measured at fair value. A debt instrument is recorded at amortized cost only if the entity is holding the instrument to collect contractual cash flows and the cash flows represent principal and interest. Otherwise it is recorded at fair value through profit or loss.

IFRS 10 – Consolidation

IFRS 10 requires an entity to consolidate an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its control over the investee. Under existing IFRS, consolidation is required when an entity has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. IFRS 10 replaces SIC-12 Consolidation—Special Purpose Entities and parts of IAS 27 Consolidated and Separate Financial Statements.

IFRS 11 - Joint Arrangements

IFRS 11 requires a venturer to classify its interest in a joint arrangement as a joint venture or joint operation. Joint ventures will be accounted for using the equity method of accounting whereas for a joint operation the venturer will recognize its share of the assets, liabilities, revenue and expenses of the joint operation. Under existing IFRS, entities have the choice to proportionately consolidate or equity account for interests in joint ventures. IFRS 11 supersedes IAS 31, Interests in Joint Ventures, and SIC-13, Jointly Controlled Entities—Non-monetary Contributions by Venturers.

IFRS 12 – Disclosure of Interests in Other Entities

IFRS 12 establishes disclosure requirements for interests in other entities, such as joint arrangements, associates, special purpose vehicles and off balance sheet vehicles. The standard carries forward existing disclosures and also introduces significant additional disclosure requirements that address the nature of, and risks associated with, an entity’s interests in other entities.

IFRS 13 - Fair Value Measurement

IFRS 13 is a comprehensive standard for fair value measurement and disclosure requirements for use across all IFRS standards. The new standard clarifies that fair value is the price that would be received to sell an asset, or paid to transfer a liability in an orderly transaction between market participants, at the measurement date. It also establishes disclosures about fair value measurement. Under existing IFRS, guidance on measuring and disclosing fair value is dispersed among the specific standards requiring fair value measurements and in many cases does not reflect a clear measurement basis or consistent disclosures.

Amendments to Other Standards

In addition, there have been amendments to existing standards, including IAS 27, Separate Financial Statements (IAS 27), and IAS 28, Investments in Associates and Joint Ventures (IAS 28). IAS 27 addresses accounting for subsidiaries, jointly controlled entities and associates in non-consolidated financial statements. IAS 28 has been amended to include joint ventures in its scope and to address the changes in IFRS 10 – 13.

Management's Responsibility for the Financial Statements

The Audit Committee is responsible for reviewing the contents of this document along with the interim quarterly financial statements to ensure the reliability and timeliness of the Company's disclosure while providing another level of review for accuracy and oversight. There have been no changes in the Company's disclosure controls and procedures during the six months ended June 30, 2011.

Internal Control over Financial Reporting

Internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with the accounting principles under which the Company's financial statements are prepared. An evaluation of the effectiveness of the Company's internal control over financial reporting was conducted as of December 31, 2010 by the Company's management, including the Chief Executive Officer and Chief Financial Officer. Based on this evaluation, management has concluded that the Company's internal controls over financial reporting were effective.

As required under Multilateral Instrument 52-109, management advises that there have been no changes in the Company's internal control over financial reporting that occurred during the most recent interim period, being the six months ended June 30, 2011, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Risks

The Company relies on equity financings to fund its activities. While it has been successful in raising funds in the past, there is no guarantee that adequate funds will be available in the future. The Company had cash and cash equivalents of \$80.6 million and working capital of \$80.1 million at June 30, 2011. Based on current planned expenditures at its Caspiche project management believes that the Company has sufficient capital resources to fund levels of activity for the next 12 months.

The Company's corporate head office is in Vancouver, Canada and the Company maintains the majority of its funds in Canadian dollars. Since the onset of the credit crisis in 2008 there still exists significant fluctuation in the value of the Canadian dollar against other currencies and because the Company operates in foreign countries it is exposed to significant currency risk. In addition, its operations may be affected by rapid price fluctuation in the countries it operates in due to potential future country defaults.

The Company is subject to substantial environmental requirements which could cause a restriction or suspension of certain operations. The current and anticipated future operations and exploration activities of the Company in Chile require permits from various governmental authorities and such operations and exploration activities are and will be governed by Federal, Provincial and local laws and regulations governing various elements of the mining industry including, without limitation, land use, the protection of the environment, prospecting, development, production, exports, taxes, labour standards, occupational health, waste disposal, toxic substances, and other matters. The Company's Caspiche project is in the pre-feasibility study stage and, as a result, current activities at Caspiche have caused little environmental impact to date. The Company conducts certain environmental restoration efforts including drill rig platform clean-up and the sealing of drill holes among other clean-up activities to rehabilitate areas affected by its operations and it is the Company's intention to ensure that the environmental impact on areas where it operates is mitigated by restoration and rehabilitation of affected areas.

The exploration and development of mineral deposits involves significant risks which even with careful evaluation, experience and knowledge may not, in some cases, be fully mitigated. The commercial viability of any mineral deposit depends on many factors, not all of which are within the control of management. Some of the factors that affect the commercial viability of a given mineral deposit include its size, grade and proximity to infrastructure, including power and water. Government regulation, taxes, royalties, land tenure, land use, environmental protection

and reclamation and closure obligations all have an impact on the economic viability of a mineral deposit. Other potential impacts could include the location of the mineral deposit and if it is found in remote or harsh climates. These unique environments could limit or reduce production possibilities or if conditions are right for potential natural disasters, including but not limited to volcanoes, earthquakes, tornados and other severe weather, could negatively impact facilities, equipment and the safety of its workers dramatically.

The marketability of minerals is affected by numerous factors beyond the control of the Company. These factors include, but are not limited to, market fluctuations, government regulations relating to prices, taxes and royalties, allowable production, import, exports and supply and demand. One or more of these risk elements could have an impact on costs of an operation and if significant enough, reduce the profitability of all future production and threaten the continuation of a particular project or operations altogether.

The Company has no production of minerals. There is no assurance that a commercially viable mineral deposit exists on any of the Company's properties, and substantial additional work will be required in order to determine the presence of any such deposit.

The Company is required to make advance royalty payments and perform certain other obligations to maintain its interest in Caspiche. In order to develop its Caspiche project the Company will require additional water supply and access to surface land for infrastructure development.

Risk factors are more fully described in the Company's Annual Information Form for the year ended December 31, 2010 (which is attached as an exhibit to the Annual Report on Form 40-F for the year ended December 31, 2010), and subsequent filings with the Canadian Securities Administrators and the SEC. You can review and obtain copies of our filings from SEDAR at www.sedar.com or from the SEC's website at <http://www.sec.gov/edgar.shtml>

NYSE Amex Corporate Governance

The Company's common shares are listed on the NYSE Amex. Section 110 of the NYSE Amex Company Guide permits the NYSE Amex to consider the laws, customs and practices of foreign issuers in relaxing certain NYSE Amex listing criteria, and to grant exemptions from NYSE Amex listing criteria based on these considerations. A description of the significant ways in which the Company's governance practices differ from those followed by domestic companies pursuant to NYSE Amex standards is set forth on the Company's website at www.exeterresource.com.

In addition, the Company may from time-to-time seek relief from NYSE Amex corporate governance requirements on specific transactions under Section 110 of the NYSE Amex Company Guide by providing written certification from independent local counsel that the non-complying practice is not prohibited by our home country law, in which case, the Company shall make the disclosure of such transactions available on its website at www.exeterresource.com. Information contained on the Company's website is not part of this annual report on Form 40-F.

Additional Information

Additional information regarding Exeter, including Exeter's Annual Information Form for the year ended December 31, 2010, is available on SEDAR at www.sedar.com.
